Special Session of the State Council.

AUTHORITY IS DISCUSSED

Acts 2, 3 and 4 Returned By President McKinley and Passed—Pardons for Admission Day.

A special session of the Council of State was held yesterday morning at 10 o'clock in the Executive Building in response to a call issued by Secretary Bolte Wednesday night. The session was called at the instance of President Dole to listen to the contents of a letter from Secretary Hay which referred to Acts 2, 3 and 4, of the Council of State which were forwarded to President McKinley for his approval of the appropriations passed.

The communications were read to the Council by Attorney-General Cooper, and the bills were also presented. In the communication a request was made that the clause reading "subject to the approval of the President of the United States," should be left out of the Acts entirely, as President McKinley did not feel authorized to affix his signature.

Those in attendance were President Dole, Ministers Mott-Smith, Young and Cooper; Councilors C. Bolte, J. A. Kennedy, W. F. Allen, Paul R. Isenberg, S. K. Ka-ne, J. L. Kaulukou, A. V. Gear, John Nott, M. P. Robinson, W. C. Achi, M. A. Gonsalves.

It was explained by President Dole that it had been supposed that President McKinley's signature was necessary to make the appropriations available. He now interpreted the sending of the Acts back to the Council as meaning that the authority of the Council of State was in itself sufficient for all purposes. However, the several departments have gone ahead with their expenditures, anticipating the final approval of the bills.

It was suggested by Gear that the Council should pass entirely new Acts, although this would be equivalent to passing upon the originals sent to Washington. It was Kennedy's opinion that the re-consideration and ultimate re-enactment of the present bills would be a proper procedure. Upon Mr. Achi's motion, the rules passed on April 30 for the use of the special session of the Council of State, were abolished, leaving the Council with a clear field to take whatever procedure would be best. Upon Mr. Isenberg's motion the three Acts in question were taken up for consideration, and a suggestion came from Mr. Gear that the bills be passed as they were. Upon Mr. Achi's motion that the bills be amended separately, the original motion was withdrawn.

Mr. Gear brought up the question of the Council's power to pass such appropriations, believing it was in their province only to pass finally upon such matters. He did not believe the Annexation Resolution carried with it the authority to allow the Council of State to take such extreme action. It was Minister Young's opinion that the Council's proceedings would be perfectly within their power to go ahead and pass the bills. The very fact that President McKinley had thrown them back on the Council of State for its action was evidence in his mind that the full confidence was reposed in the Council.

Mr. Gear then asked whether President McKinley had stated in black and white that the Council of State had the power to pass the acts. President Dole replied that the Council could interpret its powers under the circumstances. The authority had been granted in the first instance for the Council of State to pass upon whatever appropriations were necessary for the carrying on of the government. If he chose to return the acts, as stated in the letter from the State Department, then it was evident he intended to leave the matter entirely in the hands of the Council. Both Mr. Gear and Mr. Kennedy stated their ready acquiescence to vote affirmatively on the bills. In Mr. Kennedy's case he desired it placed on record that while he would vote for the passage of the bills, it would be with a doubt as to the Council's authority to do so.

Having settled the vexed question to their satisfaction, the Councilors passed favorably upon the bills in their order as numbered.

The question of Executive pardons for Admission Day was brought up by Mr. Kennedy. Mr. Dole stated that he already had under consideration certain persons whose civil privileges would be restored to them, and that he would probably issue a call for a special Council of State session to consider the cases. In reply to a question from Mr. Kaulukou, the President stated that all former political prisoners would be restored to their full rights of citizenship.

Paul Isenberg questioned whether such a course would be necessary when by the change of sovereignty all persons came into their rights. In replying to the question of Mr. Isenberg, the President stated that in his opinion persons who had been deprived of their political, and thus citizenship rights, under the Hawaiian Government, must of necessity be restored before June 14. The letter written by Secretary Cortelyou from the Executive Mansion, Washington, to Secretary Bolte regarding the fire claims, was read by the latter. The letter stated that the matter was in the hands of the attorney general.

President Dole read a letter from Major Ennis of the Sixth Artillery battalion, referring to the result of the labors at the Military Harbor Commission. The purport of it was to the effect that the new harbor lines were approved by the War Department at Washington. The letter read as follows:

"Headquarters Camp McKinley, Honolulu, H. I., June 6th, 1900.

"Hon. S. M. Damon, Minister of the Interior, Honolulu, H. I., Sir:—I am directed by the Department Commander to inform you of the following decision of the Secretary of War:

"War Department, May 4, 1900. The harbor lines at Honolulu proposed by the board of officers convened at Honolulu, Hawaiian Islands, pursuant to Special Orders No. 23, to examine and report upon proposed extensions and modifications of existing harbor lines, are approved. G. D. Meiklejohn, Acting Secretary of War."

"These are the lines as agreed upon

between the Hawaiian government and the Jahu R. & L. Co., and include the proposed exchange of lands. Very respectfully, WILLIAM ENNIS, Major, Sixth Artillery, President of Board, Commanding."

Charitable Work.

At the annual meeting of the Ladies' Portuguese Charitable Association, the following officers were elected for the next twelve months: Mrs. W. G. Irwin, president; Mrs. C. H. Hyde, first vice-president; Mrs. W. F. Allen, second vice-president; Mrs. J. D. Marques, acting manager; M. A. Gonsalves, treasurer. The treasurer's report was read giving receipts at \$2,800.45, and a balance on hand of \$1,569.33. Fifty dollars was voted for the Associated Charities. The Society has supported fifteen Portuguese in the hospital and eleven others have been assisted in various ways. The following donations formed the bulk of the receipts of the year just past: Hackfeld & Co., \$1,000, and Mrs. W. G. Irwin, \$500.

The Cory Revival.

The interest in the Cory revival meeting at the Christian Church continues to draw good audiences of attentive hearers. The Evangelist preached a stirring discourse on "What Think Ye Of Christ?" last night. Mostly all of his audience remained to a ten minutes' after-meeting. His subject tonight will be "Living For Others."

TEA AND TALK

Delightful Affair at Central Union.

Woman's Board Entertains Evangelical Association—Memorial Tributes.

The Central Union parlors were transformed yesterday afternoon into a beautiful decorated tea-room, for the Afternoon Tea given by the Woman's Board of Central Union Church in honor of the members of the Evangelical Association who are visiting in Honolulu this week. About twenty-five tables filled the smaller parlor, and quite a number were placed in the large Sunday School room. On each table was a pretty vase filled with flowers, which, with the snowy linen and glittering glassware, made a charming effect. Upon side tables were trays of sandwiches, cakes and other dainty edibles, coffee and tea, presided over by members of the Board.

Shortly after 4 o'clock the visitors seated themselves at the tables. A large crowd of Hawaiian ministers and laity members occupied special tables, but few of them were accompanied by their wives and children as on former occasions. At other tables sat representatives of the Japanese, Portuguese, Chinese and foreign churches, giving a cosmopolitan air to the scene.

Prayer was offered by the Rev. Sere E. Bishop.

The ladies having charge of the Tea were Mrs. Wells Peterson and Mrs. T. G. Thurum, assisted by Mrs. Cornelia Damon, Mrs. Robert Andrews, Mrs. W. D. Alexander, Mrs. B. F. Parker, Mrs. D. P. Peterson, Mrs. Chas. Atherton, and Mrs. McChesney. The tables and rooms were tastefully decorated under the supervision of Mrs. Vida Thurum and Miss Ella Thurum. A number of the young lady students of Kawaiahae Seminary acted as waitresses.

Following the Tea an address of welcome was made by the president of the Woman's Board, Mrs. C. M. Hyde. The response was given by the Rev. Mr. Lydgate of Hilo, Moderator of the Evangelical Association. Rev. William Morris Kincaid, pastor of Central Union Church, made an address of welcome to the visitors, which was ably responded to by Rev. Mr. Desha of the Hilo church. Greetings were also made by Rev. G. L. Pearson of the Methodist Episcopal Church, Rev. M. Thwing of the Chinese Mission, Rev. Mr. Soares of the Portuguese, and Mr. Fukukita of the Japanese churches.

Allusions were made to the Rev. C. M. Hyde, who, within the last six months, and to the late Chief Justice Judd. Touching tributes to their memories were made by the Rev. S. E. Bishop and Rev. Dr. Timoteo.

PLAGUE AND SUGAR.

Stock in the East is Light and Demand Will Result.

NEW YORK, May 24.—The week has been marked by two advances in refined sugar, the first on Monday being five points on all grades except extra fine granulated and coarse granulated, and the second on Wednesday being ten points on all grades; together 15c per 100 pounds, bringing the difference between raws and refined to 60c per 100 pounds. While the American Sugar Refining Company led in the advance, the other refiners followed at once and all thus far maintaining full rates without cutting and no shading of softs or any other grades. The demand has increased quite largely and appears to be further stimulated by the advances made, which are thought to precede further improvement as the fruit season advances. Several possibilities also exist, which may cause an unusual demand for refined sugar for several weeks given advice to carry full line of stocks, and must still repeat the same in view of the state of the raw sugar market and other conditions named. Refiners' stocks throughout the country are small, a very contingency of heavy demand will cause delays in shipments. Settlements between refiners are as far removed as ever and have no relation to the new trade conditions, although all refiners are likely to reap some benefit therefrom.

John Lancaster, the comedian, was sight-seeing with a Tommy Atkins in Quebec one day, and they had as companion and guide an old soldier. When they reached the Wolfe monument, which is located in a historic spot, Tommy said: "Wot's this?" The guide replied: "Ere's w're a great 'ero fell." "Did hit 'urt 'm?" asked Tommy. "Urt 'im!" replied the guide; "w'y hit killed 'im!"

CONUNDRUMS ARE SOLVED

What the Changes in Customs Are.

RULING ON MOOT POINTS

Merchandise Imported After June 14th Subject to United States Law.

Merchants of Honolulu who import from the States have been puzzling over a number of questions relating to customs matters that will arise in connection with the change from the Hawaiian laws to those of the United States on Thursday next. Collector of Customs Stackable prepared for the Advertiser last evening a statement giving an authoritative ruling on some of the more important questions that have been under dispute.

This statement is as follows:

"Merchandise imported into the Hawaiian Islands before the 14th of June, 1900, and entered for warehouse, or remaining unclaimed at the close of business on June 13th, 1900, and merchandise imported on or after June 14, 1900, will be required upon entry at the Custom House to pay the rates of duty prescribed by the United States tariff act approved July 24th, 1897, excepting that merchandise, the growth or product of the United States, and arriving therefrom on or after June 14th, 1900, will be considered as merchandise transported from one port of the United States to another, and not as an importation.

Merchandise withdrawn from a bonded warehouse in the United States prior to June 14th, 1900, for exportation without payment of duty to the Hawaiian Islands, will be treated upon its arrival at the Hawaiian Islands as though exported directly from the country of production, and will be dutiable.

The date of the entry of the vessel will in each case be the date of the importation of the merchandise. Vessels from the United States will be entered coastwise on and after June 14th, 1900. Importers will be required on June 14th, 1900, to present at the Custom House entries for warehouse or consumption, covering merchandise entered for warehouse prior to that date, and not already withdrawn therefrom, which entries will be in the form prescribed by the Customs Administrative act of June 10th, 1890, and in the case of entry for warehouse covering such merchandise, the prescribed bond for warehousing imported goods will be duty executed.

Domestic distilled spirits imported into the Hawaiian Islands from the United States on or before June 14th, 1900, without payment of United States Internal Revenue tax, and remaining unclaimed or in a bonded warehouse in the District of Hawaii on or after that date, upon entry for consumption or withdrawal, will be subject to a duty equal to the Internal Revenue tax.

Article 298 of the Customs Regulations of 1892 reads as follows: "Duties must be paid in coin or coin certificates of the United States, or in United States notes payable on demand, which were authorized, to be issued prior to February 25, 1862, and made receivable for public dues, or in the treasury notes issued under Act of July 14, 1890."

Article 1230 of the Regulations referred to reads as follows:

"Gold coins of the United States are receivable for duties at their nominal value, in unlimited sums, provided the loss of weight by abrasion or ordinary wear does not exceed one-half of one per centum in twenty years, or in that proportion for a shorter period of circulation."

Silver dollars of the United States, other than trade dollars, are receivable for duties, at their nominal value, in unlimited sums.

Silver half-dollars, quarter-dollars, dimes and half-dimes are receivable for duties in sums not exceeding ten dollars in any one payment.

United States demand notes, United States treasury notes and certificates of deposit of gold coin and bullion and of standard silver dollars of the United States are receivable for duties at their nominal value in unlimited amounts.

Debiture certificates for payment of drawback, which may have been issued according to law, shall be received in payment of duties at the Custom House at which they were issued."

Checks, drafts or other bills of exchange, and national bank notes, are not receivable as duties.

The office of Mr. Stackable at the Custom House will be one of the busiest places in the city during the next few days.

W. S. Chance, of Washington, representing the Treasury Department, and Andrew Smith, who has had years of experience in the customs office at

Detroit, are engaged with Mr. Stackable in working out the many new problems that will be presented when the local customs office comes under the jurisdiction of the United States Treasury Department.

Mr. Chance is one of the highest officials in the customs branch of the Treasury Department. For sixteen years he was connected with the Philadelphia customs office, but during the past few years he has been in the Department offices at Washington. He stands very close to the Administration, it is understood, although he is not in any sense a politician.

It is understood that there will be no changes in the personnel of the Custom House staff for some time to come. While the office will not need the services of so many inspectors as formerly, owing to the fact that American-made goods will come in free of duty, there will be enough work on hand for a long time to keep the entire corps of workers in the Custom House busy.

Oliver-Marques.

Dr. A. N. Marques and Miss E. M. Oliver, both of this city, were married yesterday afternoon, the Rev. Mr. Hay officiating.

Owing to the late sad bereavement in the bride's family, the wedding was of a very private description.

Immediately after the ceremony the bride's mother went on board the S. S. Warrimou to return to her home in Canada.

NEW INDUSTRY

Paper From Refuse of Sugar Cane.

Southerner Talks of Possibility of Hawaii Taking Up Novel Scheme.

"Hawaii may have a new industry soon," said a well known Southerner, "it is not improbable that in a few years the manufacture of paper from bagasse, the woody fibrous residuum of crushed sugar cane, will become an important industry. There is no question of the feasibility of this manufacture. Scientific men have urged it for some years, and in the past few years it has been demonstrated practically. A prominent sugar planter of Southeast Texas is now, and has for two years been manufacturing paper, both news and wrapping, from the diffusion chips of his sugar house. There are eleven diffusion batteries in Louisiana, and Texas, and it extracts more juice from the cane, which combined will furnish a considerable quantity of the material for paper mills. As matters now stand, this diffusion bagasse is available for paper mills, the crushing mill bagasse being used in the sugar and Texas, and it extracts more juice from the cane, which combined will furnish a considerable quantity of the material for paper mills. As matters now stand, this diffusion bagasse is available for paper mills, the crushing mill bagasse being used in the sugar and Texas, and it extracts more juice from the cane, which combined will furnish a considerable quantity of the material for paper mills.
